

Northern Territory Fossils

7 Bivalve

3 Ammonites

1 Brachiopods

5 Fossilised wood

9 Mixed bones

10 Fossilised wood

11 Diprotodontid (rhinoceros-like marsupial)

11 Lungfish jaw

18 Trilobite trackway (trace fossil)

19 Worm burrows

11 Dromornis Thunder Bird (giant goose)

19 Bacteria

20 Trilobite

21 Gastropod and trilobite

22 Great white shark tooth

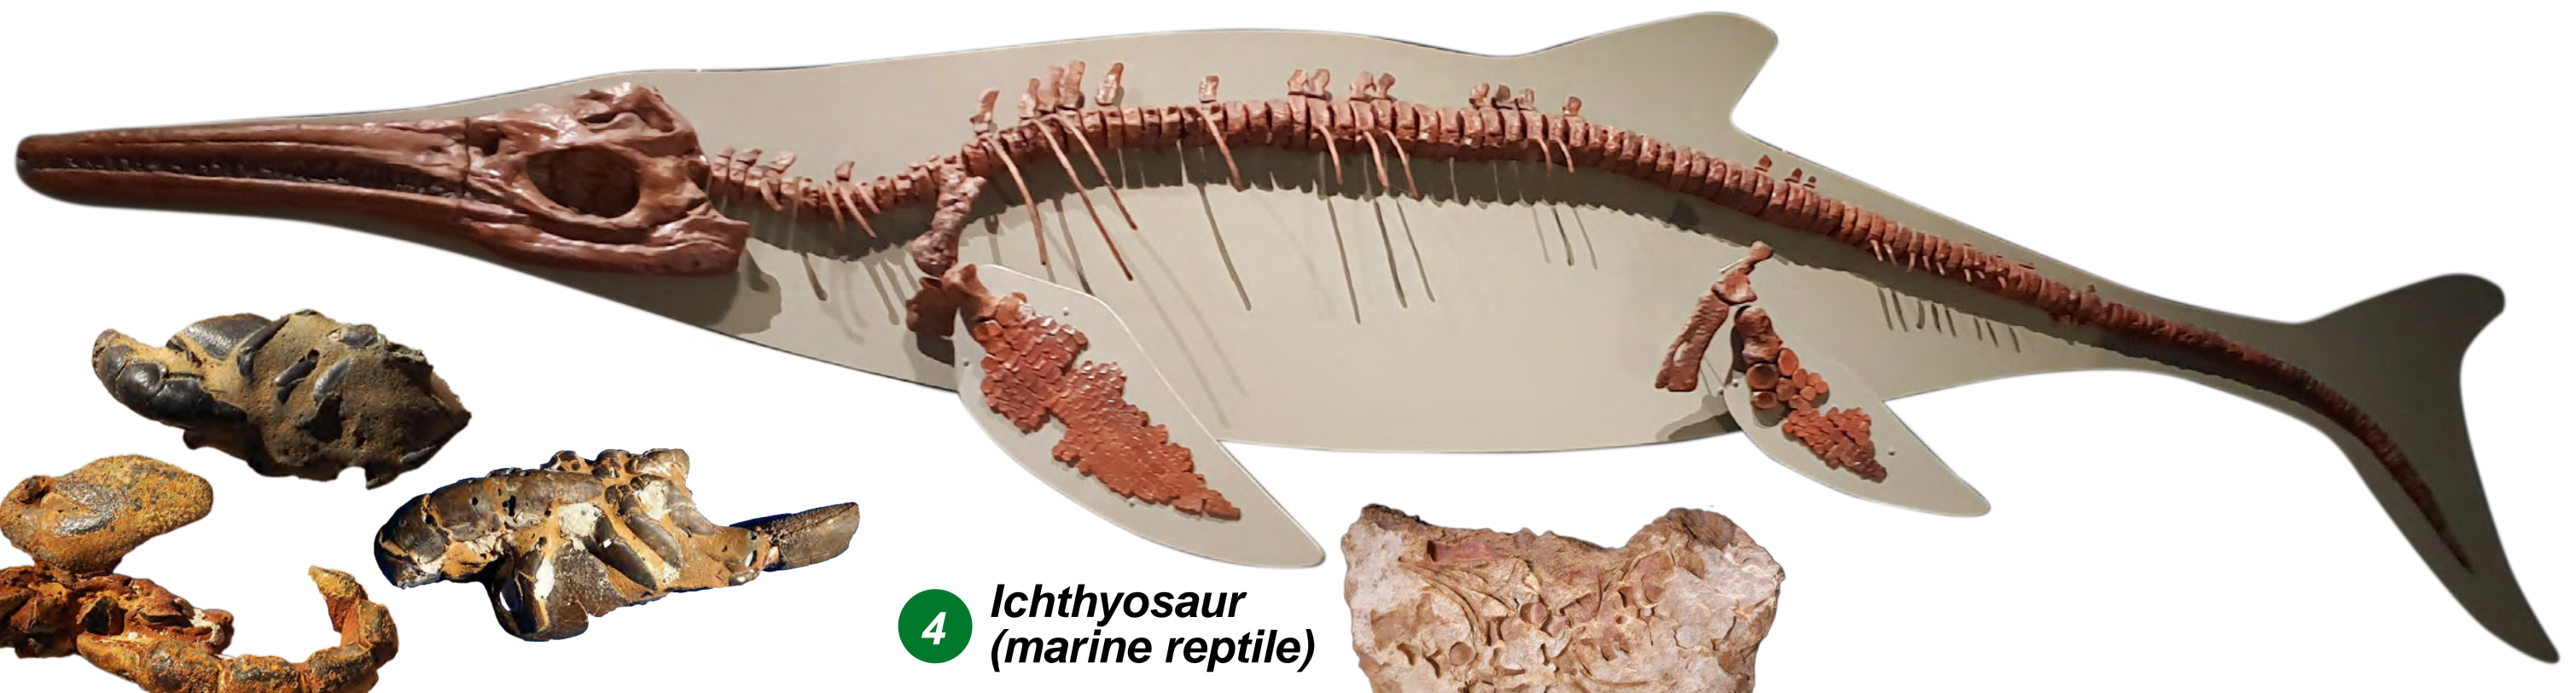

22 Pine tree

16 Baru (giant crocodile)

19 Nautiloid

4 Ichthyosaur (marine reptile)

6 Mud lobster

26 Shark teeth

7 Ammonite

2 Sponge

2 Brachiopod

5 Shark vertebra

11 Mixed bones

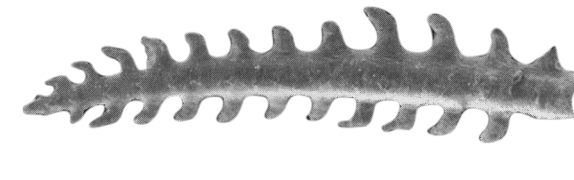

12 Stromatolite (bacteria)

12 Oncoid

12 Stromatolite

14 Glass sponge

13 Giant club-moss

15 Trilobites

15 Trilobite

22 Dinosaur bone (species unidentified)

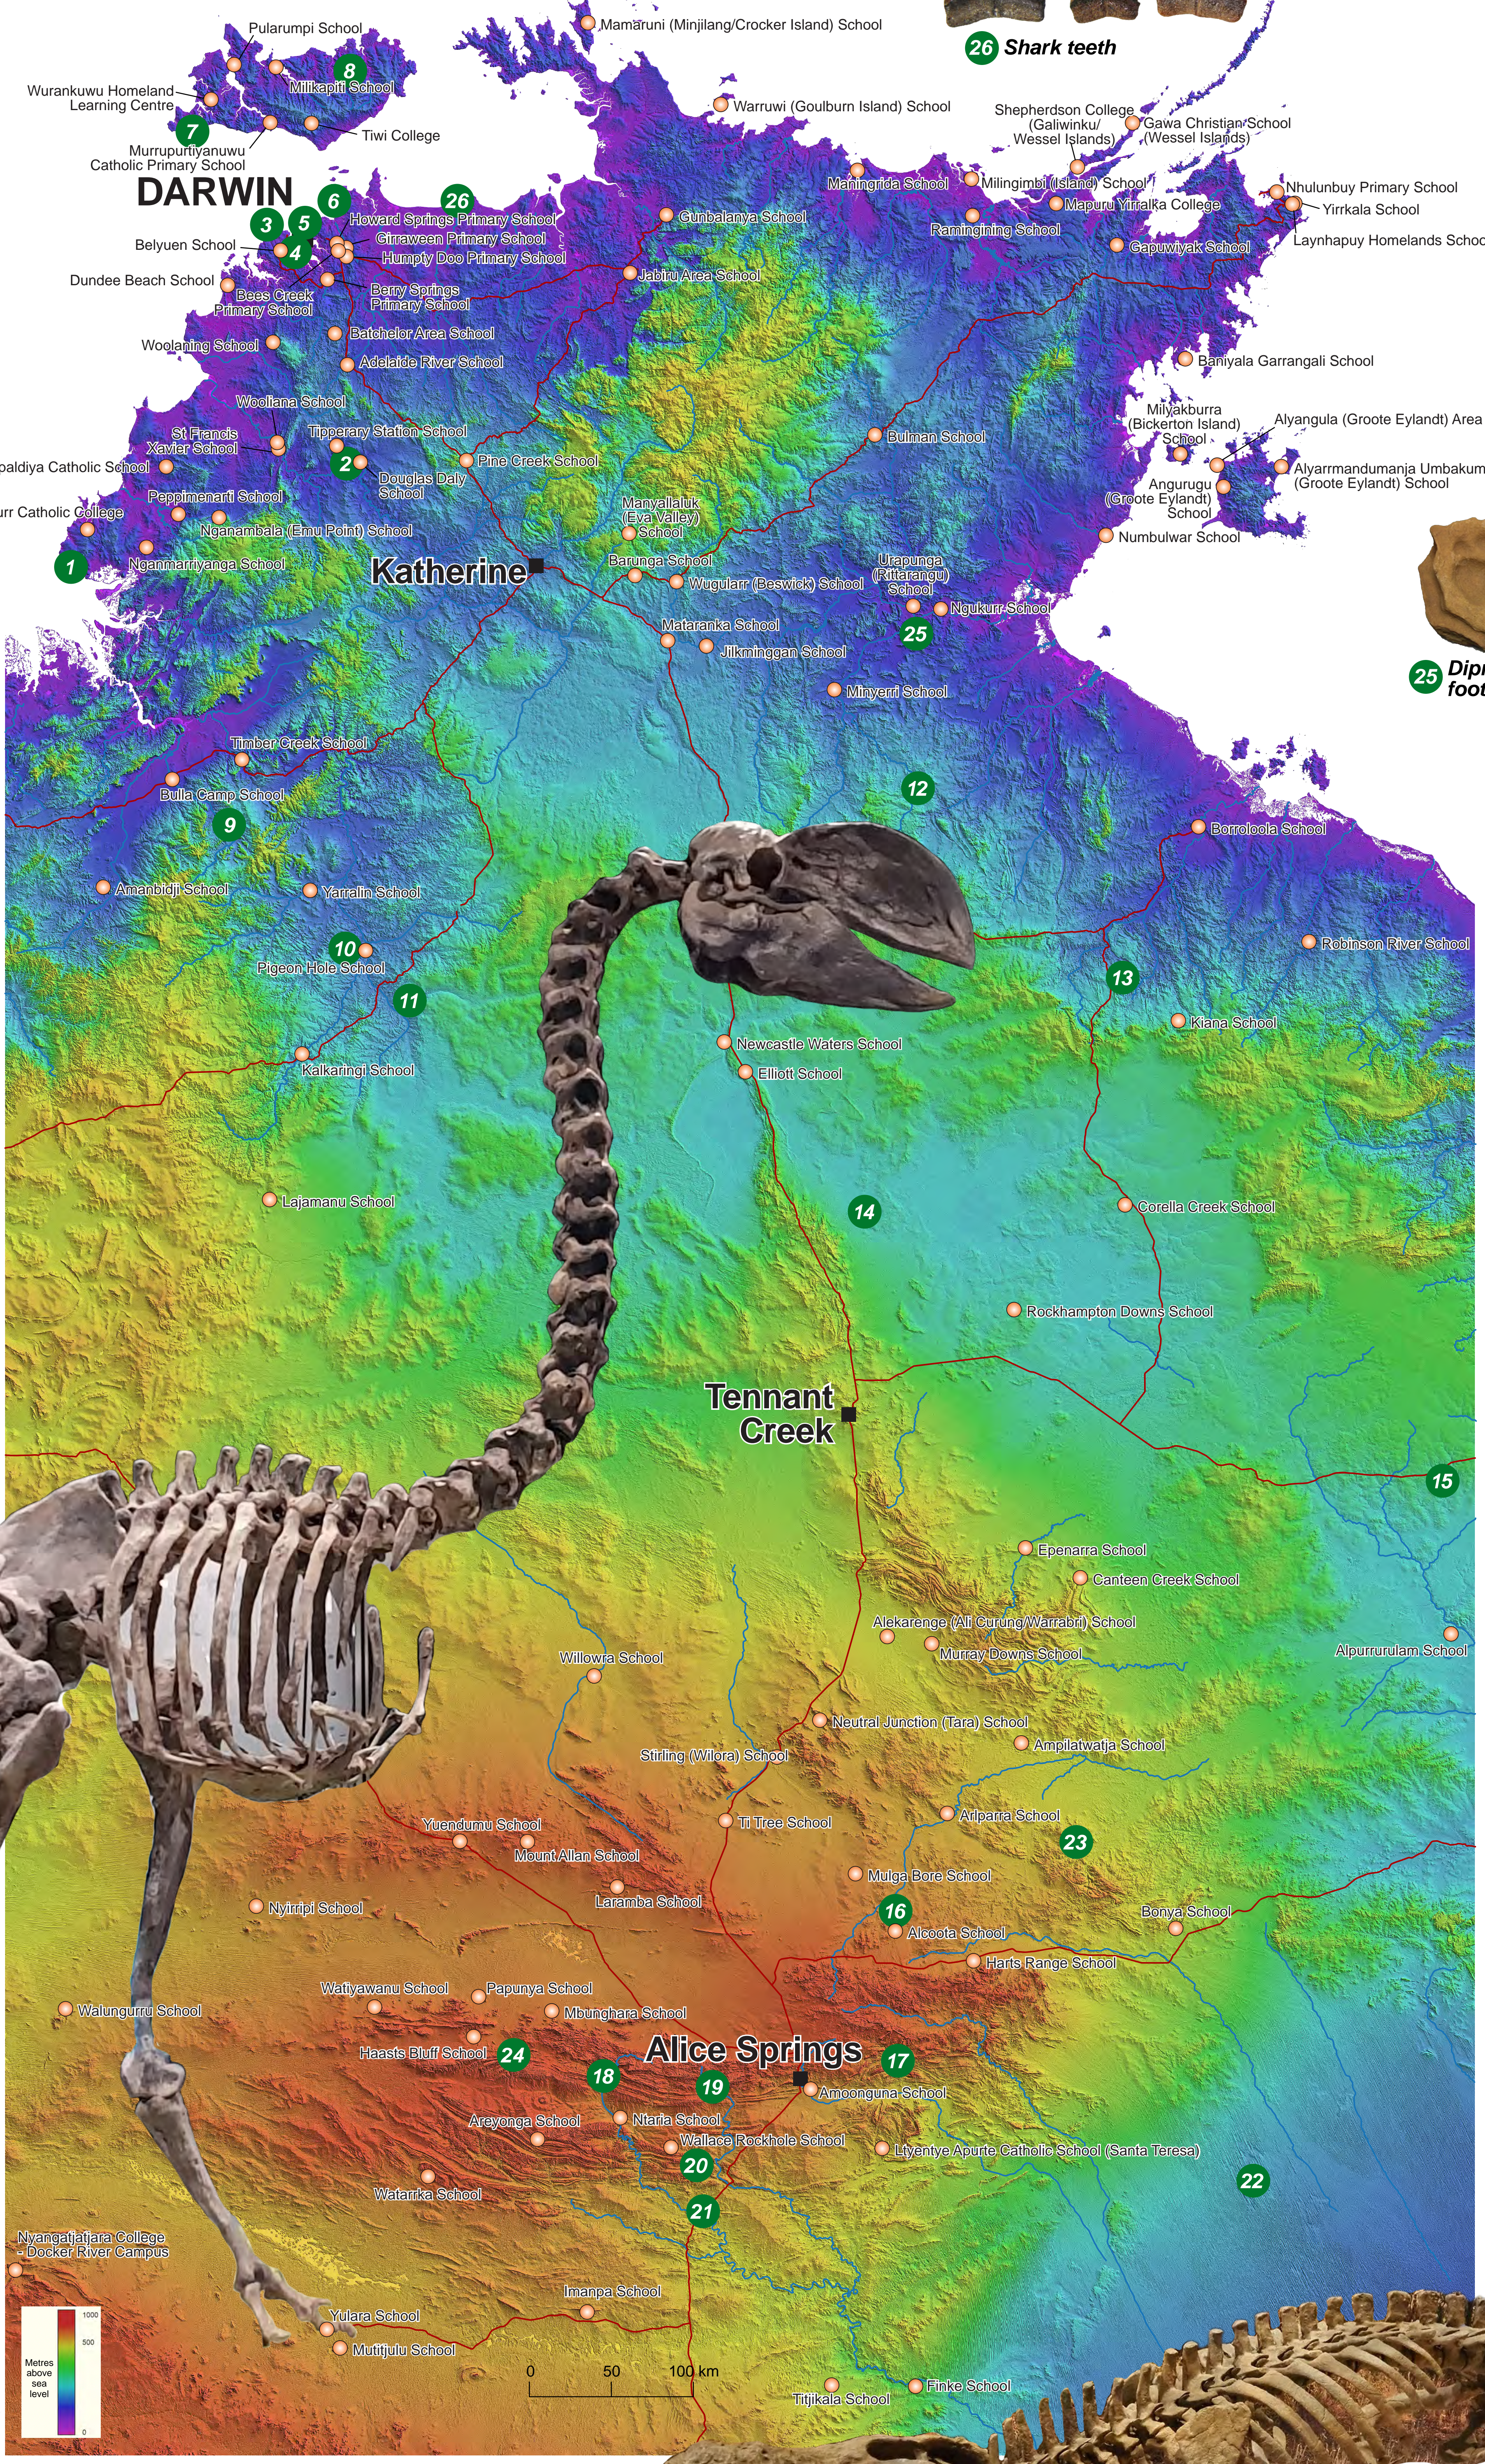

17 Trace fossil (trackway)

23 Worm castings

24 Jawed fish

Map of Northern Territory showing fossil locations. Major towns: Darwin, Katherine, Tennant Creek, Alice Springs. Fossil locations are marked with green numbers 1 through 26. The map includes a scale bar (0, 50, 100 km) and a legend.

Legend

- major town
- school
- fossil location
- road
- river
