

Table of contents

Chapter 1	The Beginning	Page 1
	The Beginning of Everything - The Origins of the Universe	
	The Solar System	
	The Sun	
	The Planets	
	Other Celestial Objects	
	The Earth	
	Investigating the Earth's Interior	
	The Earth's Atmosphere	
	The Biosphere - Life on our Planet	
Chapter 2	Geological Principles	Page 27
	Geological Principles of Time	
	Relative and Numerical Dating	
	Fossils	
	Fossils as a Measure of Time	
	The Geological Timescale	
	Types of Isotopic Dating	
	Other Methods of Finding a Numerical Age	
	Age of the Earth	
	Stratigraphy and Correlation	
Chapter 3	The Rock Cycle	Page 59
	What is a Rock?	
	The Rock Types	
	The Rock Cycle	
	Processes in the Rock Cycle	
Chapter 4	Minerals	Page 67
	Why Study Minerals?	
	What is a Mineral?	
	Mineral Names	
	The Physical Properties of Minerals	
	The Chemical Composition of Minerals	
	Mineral Crystals	

Table of contents

Chapter 5	Sedimentary Rocks and Processes	Page 89
	Sediment	
	Deposition	
	Depositional Environments	
	Lithification	
	Diagenesis	
	Classification of Sedimentary Rocks	
	Common Clastic Sedimentary Rocks	
	Chemical Sedimentary Rocks	
	Sedimentary Structures	
	Applications of Sedimentary Structures - Way Up	
Chapter 6	Igneous Rocks	Page 103
	Geothermal Gradient	
	Magma	
	Partial Melting	
	From Magma to Rock	
	Bowen's Reaction Series	
	Magmatic Differentiation	
	Classification of Igneous Rocks	
Chapter 7	Weathering and Soils	Page 113
	Weathering	
	Physical Weathering Processes	
	Chemical Weathering	
	Rates of Weathering	
	Products of Weathering	
	Soils	
	Types of Soil	
	The Soil Profile	
	Soil Formation	
	Weathering and Soil Formation in Australia	

Table of contents

Chapter 8 Weather and Climate	Page 137
Our Sun	
The Earth in Orbit	
The Seasons	
Heat Difference between Equatorial and Polar Regions	
The Atmosphere	
The Earth's Energy Budget	
Greenhouse Gases	
Atmospheric Pressure and Wind Belts	
Factors that Affect Climate	
Water in the Atmosphere	
Ocean Currents	
Climate	
Climate Regions of Australia	
Chapter 9 Ecosystems	Page 163
Ecology and Environmental Science	
Biodiversity	
The Ecosystem	
Biomes	
Energy in an Ecosystem	
How Do Ecosystems Work?	
Cycling of Matter	
Paleoecology	
Chapter 10 Plate Tectonics	Page 185
Continental Drift	
Evidence to Support Plate Tectonic Theory	
Plate Tectonics	
Plate Motion	
Glossary	Page 201
Answers for end of chapter questions	Page 218
Index	Page 231
20 Common Minerals Table	Page 244
