

Free engaging, hands-on, curriculum based incursions for earth science in the NT

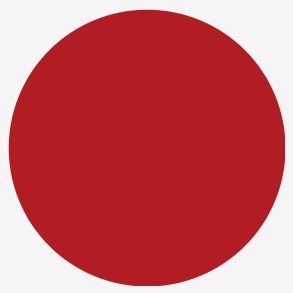

Renewable and Non-renewable resources

What makes a resource renewable?
Explore the formation of a non-renewable resource.

Rock ID

How do we examine rocks? How do we classify rocks? Have a go at classifying ours with your team!

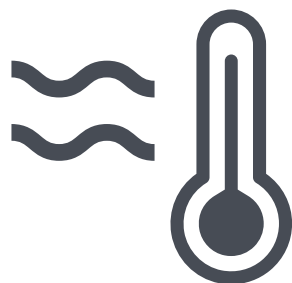

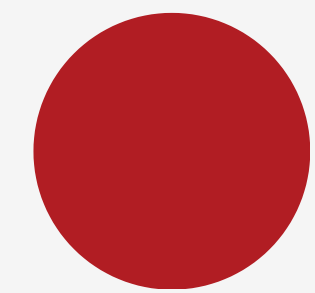

Mars Bar Earth

Model the Earth's structure and plates using mini Mars Bars. Learn more about faults too.
and

Introduction to Volcanism

What makes some volcanoes more explosive than others? What does that have to do with viscosity?

Warming Oceans

What is one of our largest carbon sinks? How are warming oceans affecting carbon absorption?
